About

A curious Software Engineer living in Istanbul/Turkey who enjoys
researching, learning and developing. I love open source development and I
am building something on my Github.

Work Experience

JotForm (Istanbul)   January 2025 — Present

Software Engineer (6 months~)

Working on multiple product within JotForm's ecosystem. Developing new features,
fixing bugs, and improving user experience across various platforms. Utilizing
React, Redux, SCSS, styled—components, and in—house technologies for consistent and
maintainable codebase.

JotForm (Istanbul)   August 2023 — January 2025

Junior Software Engineer (1 year, 5 months)

Developing and enhancing a data visualization project using React.js and Highcharts.js.
Rewrote the editor page of the project, adding new features using monaco—editor to edit
the project's JSON structure. Implementing various calculation tools outside of the
team's dashboard.

JotForm (Remote) (Part—Time)   October 2022 — May 2023

Frontend Support Engineer (7 months)

Fixed bugs in many live products on JotForm. Contributed to solving bugs by communicating
with customers one—on—one and understanding their problems.

JotForm (Remote)   June 2022 — September 2022

Frontend Developer Intern (3 months)

Developed 'frontend—gui' (a full—stack project) where you can manage(run, stop, build,
checking build size) frontend mono—repo projects in—house with a UI instead of a CLI.

Upwork (Remote) (Project Based)   March 2022 — August 2022

Junior Software Engineer (5 months)

While studying at school, took a project from Upwork called Odincity, where developments
were made using React.js.

Saypr (Remote)   March 2021 – October 2021

Junior Software Engineer (7 months)

Development using React.js, Next.js, CSS/SCSS, JavaScript technologies. Front–End part
responsive development of Figma design using Next.js. Website development for the
CabinPanda Data collection platform using React.js, Git, Bitbucket and Trello as a team.
Front–end development of the promotion website for Riot Forge Games using Gatsby.js,
and SCSS.

Education

Firat University   October 2018 – March 2023

Bachelor's Degree in Computer Engineering

Skills

(JavaScript) (TypeScript) (React/) (Next.js) (Node.js) (WebRTC) (Vue)

(Redux) (Pinia) (Vite.js) (Express.js) (MongoDB) (Mongoose) (SCSS/CSS)

(HTML) (Docker) (Vim)

Apps

TaskCard

Auto–postponing task
planner with intelligent
time blocking. Drag & drop
tasks into time slots, set
priorities, and let smart
postponement system
automatically reschedule
missed tasks.

(Swift) (SwiftUI) (iOS) (macOS)

SwiftDays

Track important dates and
deadlines with beautiful
countdown timers. Create
unlimited countdowns with
customizable widgets and
timely notifications.

(Swift) (SwiftUI) (WidgetKit)
(iOS) (macOS)

StreakChart

Visual habit tracking with
beautiful charts. Build
momentum with color–coded
squares that show your
progress at a glance, just
like GitHub's contribution
graph.

(Swift) (SwiftUI) (SwiftData)
(iOS) (macOS)

StarType

Fast–paced typing space
adventure. Navigate
through asteroid fields,
battle enemy ships, and
save the galaxy while
improving your typing
speed and accuracy.

(Swift) (SwiftUI) (SpriteKit)
(iOS) (macOS)

githubba

Swipe to discover GitHub
repos. Tinder–style
interface for discovering
curated repositories with
GitHub integration and
personalized
recommendations.

(Swift) (SwiftUI) (GitHub API)
(iOS) (macOS)

TrackLens

Professional screen
recording with camera
overlay in stunning 4K
quality. Perfect for
content creators,
educators, and
professionals.

(Swift) (SwiftUI) (AVFoundation)
(macOS)

Projects

Sketchbook

Some methods, approaches, projects, and experiments that I have learned by trying/experimenting

(TypeScript) (Svelte)

(Computer Science) (Rust)

(other stuff)

Githubba

Tinder but to explore GitHub repositories

(TypeScript) (React) (Tailwind)

MonoRepo Manager

A tool that allows you to manage your JS/TS monorepo projects.

(TypeScript) (React) (Rust)

(SCSS)

chefim.net

The best idea for cooking

(TypeScript) (Vue) (SCSS)

(Dockerfile) (Docker) (MongoDB)

(Express.js) (Node.js)

(Google Auth) (Vercel) (Render)

taskcard.net

TaskCard is a minimalist daily planning app designed to simplify how you organize your day. Each day is represented as a card, where users can divide their time into hourly slots and plan tasks efficiently.

(TypeScript) (Vue) (SCSS)

(Dockerfile) (Docker) (MongoDB)

(Express.js) (Node.js)

(Google Auth) (Vercel) (Render)

Texus

A Terminal User Interface (TUI) application for managing frontend monorepos.

(Rust) (Ratatui) (Tokio)

(Tracing)
